

**ACCROLON® 9000 Bearing Grade:**

≡ Designed for the most demanding industries

Accrolon® 9000 applications include replacing bronze bearings in the dryer section of paper mills. Our bearings are non-galling, run dry and reduce maintenance cost. If you are still running bronze, you can't afford not to try our 9000 materials today!

We offer *Breakthrough Materials* that are compression molded and CNC machined to your exact need.

**Applications:**

- Pump Bearings
- Guide Bushings
- Journal Bearings
- Flanged and Sleeve Bearing
- Wear Rings
- Dryer Drum Inserts
- Pillow Block Replacements

**Solutions:**

- FDA, 3A and USP-VI equipment
- Heat ovens and Process Equipment
- Extruders and Mixers
- Heavy Duty Off Highway Equipment
- Rail Road and Tanker Truck
- High Temp/Pressure Valve Seats

Advantages:

- Dry Running/Oil Free
- Will not damage shaft
- Excellent Chemical Resistance
- Low Friction
- Great option for CIP wash down
