

January 13, 2023

Dear customers and friends,

To better serve our main customer base in the manufacturing field. Accro-Seal has sold the AccroLube Product line and all associated grease products to a local and family-owned company (Metalloid) of Sturgis, Michigan (269) 503-7300. The grease formula and the packaging have remained the same. Metalloid is committed to providing the same level of service that you are used to and will work hand in hand with Accro-Seal to make this transition a smooth and successful one.

Metalloid Corporation, a metalworking fluids manufacturer, has acquired **AccroLube** from **Accro-Seal Inc**, Vicksburg, Michigan, manufacturers of High-Temperature Polyurea grease with PTFE.

The acquisition of **Accrolube** fits into **Metalloid Corporation's** strategy to serve our current better and expand our customer portfolio. By purchasing **AccroLube**, this product line will increase and diversify Metalloid's already expansive metalworking fluids to also now include **AccroLube**. This will allow **Metalloid Corporation** to offer customers a specially formulated Polyurea grease with PTFE.

Don't hesitate to get in touch with Metalloid Corporation for product information.
